

POWER OUTAGE

Figure out what is needed during a blackout by making this:

Step 1 - You will need:

- 1 - Tape
- 1 - Toilet-paper roll
- 1 - Scissors (have a parent help you)
- 1 - Small disposable foam or plastic cup
- 1 - Colored construction paper
- 1 - Piece aluminum foil or a shiny sheet of scrapbooking paper

Step 2 - Take your reflective paper and cover the large mouth of your cup and tape the edges of paper to the sides of the cup. Be careful to tape over just the edges and not over the reflective paper trim paper if needed.

Step 3 - Place the small base of the cup into the toilet-paper roll by and attach by using tape. You may need to make small cuts into the toilet paper roll so that you can bend the end to fit the cup better.

Step 4 - Cut your paper to the size and tape it around the outside of the cup and the tube.
